

Mahindra & Mahindra

Three-Statement Model | Scenario Analysis 2027-2031

- Base: 13.4% growth (core view)
- Best: +5% price, 12% volume CAGR
- Worst: -5% price, fading volumes
- All Rs Crores | Sep 2026

Model Framework

Forecast from FY2027 | Linked IS / BS / CF

- 124.35 Cr shares @ Rs 3,114 | 20% payout
- Capacity 1,416k -> 2,832k units (no bind)
- Tax 21% | Cash 5% / Revolver 8% / Term 8.5%
- Capex Rs 12,000 Cr + Rs 4,500 other / yr

Revenue: Volume x Price

Best holds price (+5%) | Worst discounts (-5%)

- Realisation Rs 12,75,225 -> Rs 15,50,044
- Volumes 1,234k -> 2,175k @ ~12% CAGR
- 2031: Base Rs 1.85L Cr / Best Rs 3.37L Cr
- Worst Rs 1.40L Cr | Pricing decides prize

Profitability

EBITDA margin & Net Income, 2027 vs 2031

- Base: 6.6% -> 12.4% | NI Rs 4,585 -> 12,641 Cr
- Best: 13.6% -> 12.0% | NI Rs 18,044 -> 29,379 Cr
- Worst: 0.8% -> 10.6% | 2027 loss Rs 603 Cr
- 7% cost inflation bites when price slips

Cash & Balance Sheet

Self-funded | Revolver is a bridge, not a crutch

- OCF Rs 13,167 Cr despite WC drag Rs 6,849 Cr
- Investing -Rs 16,500 Cr / yr, every year
- Revolver peak Rs 8,094 Cr -> net cash by 30-31
- Equity Rs 88,760 -> Rs 1,67,199 Cr

Risks & Takeaway

What could break it | The one line to remember

- 7% cost inflation | SGA step-up Rs 9,583 Cr
- WC bulge + Rs 12k Capex / yr | Worst 2027 loss
- Hold price, fund growth internally,
- treat 2027-28 as the stress window.
